

Prabhnoor Singh

COMPUTER SCIENCE STUDENT | SOFTWARE DEVELOPER

Victoria, BC | prabhnoorarcher@gmail.com | github.com/prabhnoob

Computer Science student and software developer building responsive web products, mobile workflows, systems projects, and interactive 3D experiences. Focused on clear component architecture, accessible interaction, maintainable code, and turning technical complexity into useful product experiences.

SELECTED PROJECTS

UVcraft

React | TypeScript | Three.js | React Three Fiber | Vite

Built a browser-based 3D University of Victoria campus walk with desktop and mobile controls, modular scene systems, GIS-derived campus geometry, and optional LAN co-op. [Live demo](#) | [GitHub](#)

Stock Evolver

React | TypeScript | Data visualisation

Designed an interactive investment-analysis dashboard with reusable components and focused views that make dense market information easier to scan and compare.

SmartLift

Expo | React Native | Firebase

Shaped a mobile workout experience that connects authenticated user flows with persistent routine and workout tracking across sessions.

Wildfire Tracker

React | NASA EONET | Mapping APIs

Transformed NASA EONET wildfire data into an interactive geographic overview with incident markers and focused event details.

CSC 360 Simple Shell

C | Linux | Systems programming

Implemented a command shell exploring process execution, background jobs, signal handling, and process lifecycle management.

EDUCATION

Bachelor of Computer Science

University of Victoria

In progress | Expected 2027

EXPERIENCE

Cook / Customer Service

Felicita's University Pub | Apr 2025 - Present

Coordinate with a service team during high-volume shifts while balancing quality, safety, timing, and customer needs.

Sales Associate

Walmart - Hillside Victoria | 2023 - 2025

Supported customers, inventory, presentation, and point-of-sale operations with accuracy and dependable teamwork.

TECHNICAL TOOLKIT

Languages

TypeScript, JavaScript, C, Python, SQL

Web and mobile

React, Vite, Expo, HTML, modern CSS

Data and platforms

Firebase, REST APIs, mapping, data visualisation

Systems and graphics

Linux, Git, GitHub, Three.js, React Three Fiber

OPEN TO SOFTWARE CO-OP, INTERNSHIP,
AND COLLABORATION OPPORTUNITIES
